The Program also recognizes GeoSyntec Consultants who provided the technical analysis and report that form the basis of Chapter IV, Stormwater Treatment Control Sizing, as well as materials for Chapter III, Selecting BMPs. They are also in the process of completing technical analyses that will contribute to the content of Chapter V, Peak Flow and Volume Control Measures- Hydromodification Management Plan Guidance.

EOA, Inc., as the Program management consultant, coordinated and compiled the information and was responsible for the overall preparation of this document. Wendy Edde took photographs unless otherwise noted.
